

Want to help shape
the future of renewable
energy generation in

West Yorkshire?

 **Calderdale**
energy park

To achieve the
UK's clean energy goals,
the country needs to

**double onshore
wind power
generation
by 2030.**

A woman with dark hair tied back, wearing a beige knit sweater over a white t-shirt, is shown in profile from the chest up. She is smiling and has her right hand resting on a white light switch on a white door. The background is a plain wall with a door handle visible below the switch. A large teal arc is on the left side of the image.

Our proposals would
generate enough
renewable energy

**to power
thousands
of homes.**
