This Zone of Theoretical Visibility (ZTV) has been generated using ESRI ArcGIS Spatial Analyst extension using the assumptions detailed in the infobox below. The digital terrain model (DTM) used is: OS Terrain 5 dataset (+/-2 m) up to 20km from turbine locations, OS Terrain 50 dataset (+/-10 m) outwith this.

The ZTV view height of 2 m above ground level is recommended by "Visual Representation of Windfarms" NatureScot February 2017 - Version 2.2.

The ZTV is generated from a bare earth terrain and does not account for the screening effect of features within the landscape such as settlements and woodland. The ZTV shows potential theoretical visibility only and is for informing 'on the ground' visual assessment.

Blade tip:	200m - 150m	Observer height:	2m
DTM:	OS T5/T50 DTM	Surface features:	Not Included
DTM resolution:	10m	Earth curvature:	Included
